Angola, Aug. 9th, 2013

Dear President Obama:

If you, as President, truly seek freedom and justice for all you must act to right the wrongs committed by our government in years gone by. Begin by granting Executive Clemency to Leonard Peltier.

Leonard Peltier, an innocent man, was convicted for the 1975 shooting deaths of two agents of the Federal Bureau of Investigation. U.S. prosecutors have repeatedly admitted that they did not and cannot prove Peltier's guilt and the appellate courts have cited numerous instances of investigative and prosecutorial misconduct in this case. As late as November 2003, the 10th Circuit Court of Appeals acknowledged that "...Much of the government's behavior at the Pine Ridge Reservation and its prosecution of Leonard Peltier is to be condemned. The government withheld evidence. It intimidated witnesses. These facts are not disputed."

The courts claim they lack the power to right this wrong. But, as President, you can.

After careful consideration of the facts in Leonard Peltier's case, I have concluded that Leonard Peltier does not represent a risk to the public. First, Leonard Peltier has no prior convictions and has advocated for non-violence throughout his prison term. Furthermore, Leonard Peltier has been a model prisoner. He has received excellent evaluations from his work supervisors on a regular basis. He continues to mentor young Native prisoners, encouraging them to lead clean and sober lives. He has used his time productively, disciplining himself to be a talented painter and an expressive writer. Although Leonard Peltier maintains that he did not kill the agents, he has openly expressed remorse and sadness over their deaths.

Most admirably, Leonard Peltier contributes regular support to those in need. He donates his paintings to charities including battered women's shelters, half way houses, alcohol and drug treatment programs, and Native American scholarship funds. He also coordinates an annual gift drive for the children of the Pine Ridge Indian Reservation—a successful program that, in 2006, expanded to include other reservations throughout the country.

A six-time Nobel nominee, Leonard Peltier is widely recognized in the human rights community for his good deeds and in turn has won several human rights awards including but not limited to the North Star Frederick Douglas Award; Federation of Labour (Ontario, Canada) Humanist of the Year Award; Human Rights Commission of Spain International Human Rights Prize; and 2004 Silver Arrow Award for Lifetime Achievement.

Leonard Peltier is over 67 years old and his health is deteriorating. He has suffered a stroke which left him partially blind in one eye. For many years, Peltier had a seriously debilitating jaw condition which left him unable to chew properly and caused consistent pain and headaches. Today, Leonard Peltier continues to suffer from diabetes, high blood pressure, and a heart condition, as well as emerging conditions. He risks blindness, kidney failure, stroke, and certainly premature death given his diet, living conditions, and health care.

Peltier has served his time. Even by the government's own definition, he has already been imprisoned for a lifetime. In that time, he has missed the simplest things of ordinary life—having dinner with friends, taking walks in the woods, gardening, children's laughter, dogs barking, the feel of rain on his face, the sound of birds singing... winter and summer and spring and fall. He has missed seeing his children and grandchildren grow up. They suffer, too. Leonard Peltier is now a great-grandfather. How many more generations must suffer this tragedy?

I say enough is enough, Mr. President. Do the right thing. Grant Executive Clemency to Leonard Peltier right away.

Thank you for giving fair consideration to Leonard Peltier.

Sincerely,

Kenny Zulu Whitmore
