„Freedom and Med Care for Leonard Peltier. For 40 years former American Indian movement aim activist Leonard Peltier has been in the crunches of US prison system, the Iron House of the whites, as indigenous people call, on trumped-up murder charges. Now, as he suffers poor health and an abdominal aortic aneurysm, time is no longer on his side. The aneurysm, diagnosed just weeks ago, threatens his very life. So supporters of Leonard are demanding his freedom, so he doesn't perish in the Iron House. Decades ago, when Bill Clinton was president he visited Pine Ridge, South Dakota, once Peltier's home, and told people there: „Tell Leonard I won't forget about him.”

A promise from Clinton proofed as empty as any politicians promise – gas, air, wind. Well, he must have forgotten, he? So Peltier languished in the Iron house as decades passed. He wrote, he painted, and he waited white justice. He's still waiting.

His supporters want people to write to the BOP, demanding his health care and release. The International Leonard Peltier Defense Committee needs you to write and call on Leonard's behalf. Contact <https://www.bop.gov/inmates/concerns.jsp>

Refer to Leonard Peltier number 89637-132 and his home jail USP Coleman 1, and now that I think about it, why don't you write to the white house and demand exactly the equivalent thing. Leonard Peltier needs freedom now and native people need him to return home.

From a prison nation. This is Mumia Abu-Jamal.”
